

Why ChildcarePro?

ChildcarePro is a childcare management software solution designed in partnership with customers and industry representatives by NumeroPro, one of Australia's leading child care technology providers. NumeroPro has been associated with the childcare industry since the inception of Childcare Assistance and as such our team members have been able to build a program tailored to specific needs of the industry.

Unlike some providers who have upgraded or added to their old software, ChildcarePro was written from scratch to specifically ensure compliance with the Federal Government's new Child Care Management System (CCMS) and to take advantage of modern technology which makes running a centre easier, and is already available in a CCMS registered version.
